Alon Krumer

Fullstack Developer

Alon1525@gmail.com • 050-2466667 • LinkedIn • Github • Website

SUMMARY

Full-Stack Developer with a B.Sc. in Computer Science and hands-on experience building cross-platform applications. Currently focused on developing a pre-launch MVP from the ground up using **React Native, Node.js, and Cloudflare R2**. Experienced in implementing real-time features and maintaining system reliability through observability tools like **New Relic and PostHog**. Passionate about clean code, problem-solving, and taking ownership of technical tasks from design to deployment.

EDUCATION

B.Sc. in Computer Science 2021-2024 **Ben-Gurion University of the Negev**

- Completed large-scale team projects involving system design, client-server architecture, and multithreading.
- Strong foundation in data structures, algorithms, object-oriented programming, and concurrency.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Stealth Startup (Pre-launch) Dec 2025 – Present

- **MVP Architecture:** Driving the full-stack development of a cross-platform (iOS, Android, Web) application using **React Native**, **Expo Router**, and **React Native Web** to maintain a unified codebase.
- **Infrastructure & Backend:** Developed type-safe REST APIs via **Node.js/Prisma** and implemented **Cloudflare R2** for **S3**-compatible **Cloud** storage, significantly reducing egress costs and optimizing asset delivery.
- **AI-Driven Velocity:** Leveraged **Cursor** and LLM-integrated workflows to accelerate the SDLC, streamlining complex logic refactoring and rapid feature prototyping to meet aggressive milestones.
- **Real-time & Performance:** Integrated **Socket.io** for low-latency data synchronization and optimized **PostgreSQL** performance through advanced indexing and query optimization.
- **Product Strategy & Analytics:** Utilized **Mixpanel** and **PostHog** (Feature Flags & Session Recordings) for data-driven UI/UX improvements and controlled production rollouts.
- **DevOps & Reliability:** Automated CI/CD via **GitHub Actions** and ensured system health through **New Relic (APM)**, **Vitest**, and **Playwright** end-to-end testing.

PROJECTS

Scora 2025 **Personal Project**

- Built a full-stack web application using **React, Node.js, and PostgreSQL** with mobile-optimized UI.
- implemented a **RESTful API** with 15+ endpoints for authentication, predictions, scoring, and leaderboards.
- Automated data ingestion using GitHub Actions to fetch live match data every 6 hours, reducing manual updates to zero.
- Optimized database performance through indexing, bulk operations, and caching, reducing load times and external API calls by approximately 50%.
- Implemented authentication and authorization using Supabase Auth, JWT, and row-level security.
- Deployed the application to Vercel for production use: (Live Production).

SKILLS

Programming Languages: TypeScript, JavaScript, Java, Python, C, C++, C#
Frontend: React Native, Expo (Router/Web), React, HTML5, CSS3
Backend: Node.js, Express, Prisma ORM, REST APIs, JWT, Socket.io
Databases: PostgreSQL, Supabase, MongoDB, MySQL
DevOps & Cloud: Git, GitHub Actions (CI/CD), Cloudflare R2, Railway, Vercel
Product & Monitoring: New Relic (APM), Mixpanel, PostHog (Feature Flags)
Concepts: Data Structures, Algorithms, OOP, Multithreading, Client-Server Architecture
AI & Productivity: Cursor, LLM Prompt Engineering, Copilot.
Languages: Hebrew (Native), English (Fluent)

Army

IDF Combat Medic & Artillery – Developed high-pressure teamwork, leadership, and responsibility in demanding environments.
